

U.S. ENVIRONMENTAL PROTECTION AGENCY NOTIFICATION OF HAZARDOUS WASTE ACTIVITY		INSTRUCTIONS: If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).

RE: Notification of Hazardous Waste Activity

Gentlemen:

Occidental Chemical Corporation is currently beginning remedial activity at its inactive 102nd Street landfill site. This remedial activity requires us to transport contaminated water from the site to our waste water treatment unit located at our Buffalo Avenue plant facility. Transportation of this water has already begun using EPA ID Number NYD 980506810 which was given to our Mr. Jay Cull by the U.S. EPA Region II site coordinator, Mr. Kevin Lynch. Mr. Alan Fuchs, the NYS DEC site coordinator, has also been notified that we will be using this ID number.

In light of this, I have been requested to complete the required Notification of Hazardous Waste Activity. If you will note in Section VIII, even though this is a first notification, I have used the above EPA ID number. This ID number should be maintained so as not to invalidate the manifests for the two loads of waste we have already moved.

Very truly yours,

Robert H. Simmington
Sr. Environmental Engineer

PUBLIC NOTICE

No. 85-145

NHD 980 506 810

Date: 11-12-85

Notice is hereby given that the U.S. Environmental Protection Agency (EPA) proposes to authorize the Occidental Chemical Corporation of Niagara Falls, New York (applicant) to conduct a trial burn of polychlorinated biphenyls (PCBs), regulated under the Toxic Substances Control Act (TSCA) and selected chemicals regulated under the Resource Conservation and Recovery Act (RCRA) in the incinerator located at the applicant's Niagara Plant facility on Buffalo Avenue in Niagara Falls, New York. The authorization for the PCB trial burn would be granted by U.S. EPA Region II under the authority of the rule entitled "Polychlorinated Biphenyls Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions" (Title 40, Code of Federal Regulations, Part 701), written pursuant to Section 6(e)(1) of TSCA. The trial burn of chemicals other than PCBs would be authorized under 40 CFR 270.62, regulations promulgated under RCRA.

A series of three trial burns has been proposed. One trial burn would involve the use of the Niagara Plant wastes not including dioxins, which are regulated under RCRA. A second trial burn would involve the use of PCBs which are regulated under TSCA. The applicant would, under terms of this authorization, be allowed to conduct the non-dioxin (RCRA) and PCB (TSCA) trial burns to document the destruction of the PCBs and the selected primary organic hazardous constituents. The starting date of the trial burn for PCB's will be specified by the applicant to U.S. EPA Region II, the State of New York, the County of Niagara and the City of Niagara Falls, New York, at least 30 days prior to the conducting of the trial burn. The results of the PCB trial burn would be used to finalize the trial burn procedures for samples of dioxins and PCB containing wastes from Occidental's Hyde Park Landfill. EPA will then review Occidental's PCB/dioxin trial burn procedures for purposes of authorizing the PCB/dioxin trial burn.

As part of EPA's evaluation of the Occidental Chemical Corporation's application, public comments are being solicited. Comments must be submitted no later than 30 days after the date of the notice.

Comments may be directed to:
